

Core Procedure Skills on Completion of Specialist Training in Obstetrics & Gynaecology

A) Obstetrical

1. Vaginal delivery of twin pregnancy
2. Breech delivery
3. Vacuum extraction
4. Forceps delivery
5. Complicated Caesarean section *
6. Cervical cerclage
7. Manual removal of placenta
8. Replacement of uterine inversion
9. Management of shoulder dystocia
10. Repair of extended / 3⁰ perineal tear
11. Repair of ruptured uterus
12. External cephalic version
13. Level II ultrasound examination
14. Amniocentesis under ultrasound guidance

B) Gynaecological

1. Suction & Curettage
2. Colposcopic Examination & Procedure
3. Cone Biopsy/LLETZ/ Electrodiathermy
4. Cervical cerclage
5. Anterior colporrhaphy
6. Posterior colpoperineorrhaphy
7. Vaginal hysterectomy
8. Abdominal hysterectomy
9. Myomectomy

10. Oophorectomy
11. Omentectomy
12. Ovarian cystectomy
13. Bilateral tubal ligation - Minilaparotomy, Laparoscopic
14. Laparoscopy
 - Diagnostic,
 - Therapeutic
 - Adhesiolysis
 - Salpingolysis
 - Ovarian drilling
15. Cystoscopy
16. Hysteroscopic - Diagnostic
17. Intrauterine insemination
18. Ultrasound examination - Abdominal, Transvaginal (including follicular tracking)

SPECIALIZE PROCEDURE - OBSTETRIC & GYNAECOLOGY

1. GYNAE ONCOLOGY
2. MATERNO FETAL MEDICINE
3. REPRODUCTIVE MEDICINE
4. URO-GYNAECOLOGY

1. GYNAE ONCOLOGY

No	Procedures	Minimal Training necessary for competence	Maintenance of competence	Please indicate () the procedures that a generalists can perform with the required minimum training	Minimal training necessary for a generalist to perform the procedure competently
1	Radical Hysterectomy	MOG/MRCOG Fellowship in Gynae Oncology	5 procedures /year	Yes	Six month attachment to a gynae oncology centre
2	Radical vulvectomy		1 procedure /year	Yes	

2. MATERNO FETAL MEDICINE

1	Cordocentesis	MOG/MRCOG Fellowship in Materno -fetal medicine	10 procedures per year	No	-
2	Chorion Villus sampling		10 procedures per year	No	
3	Amniocentesis (Early 14-16 weeks)		10 procedures/year	No	
3	Amniocentesis (Late >20 weeks)		10 procedures per year	Yes	Level 2 U/S Course 1 month attachment to a fetomaternal centre
4	Ultrasound scanning Level 3		100 procedures per year	Yes	6 month attachment to a recognised training centre
5	Doppler wave form studies		30 procedures/year	Yes	Attendance at a Doppler course and

					logged experience post training of 30 cases
6	In-utero fetal exchange transfusion		5 procedures /year	No	

3. REPRODUCTIVE MEDICINE

No	Procedures	Minimal Training necessary for competence	Maintenance of competence	Please indicate () the procedures that a generalists can perform with the required minimum training	Minimal training necessary for a generalist to perform the procedure competently
1	Tubal reanastomosis	MOG/MRCOG Fellowship in Reproductive Medicine	2 procedures /year	Yes	Attachment to accredited surgeon and perform 2 procedures under supervision
2	Laparoscopic surgeries Ectopic pregnancy Cystectomy Adhesiolysis		10 procedures /year	Yes	Attended formal laparoscopic course
3	Laparoscopic assisted vaginal hysterectomy		5 procedures /year	Yes	Attended formal laparoscopic course

4. URO-GYNAECOLOGY

No.	Procedures	Basic Qualification	Criteria
1.	Laparoscopic Colpo Suspension	MOG/MRCOG or equivalent	<ol style="list-style-type: none">1. Attended a formal training course2. Assisted an expert in 5 operations3. Performed 5 under supervision4. Performed 5 independently without major complication5. A log book of all operations assisted and performed
2.	Periurethral Injection Macroplaques	MOG/MRCOG or equivalent	<ol style="list-style-type: none">1. Attended a formal training course2. Assisted in 4 procedures3. Performed 4 under supervision4. Performed 4 independently without major complication5. A log book of all operations assisted and performed
